Problem Statement : AI for Media, Content & Digital Experiences

aws Built on AWS

VyapaarAI

The Ad Agency in Every Shopkeeper's Pocket

Designed to revolutionise how small, independent shopkeepers approach advertising. Vyapaar AI's core motive is to equip the local businesses with powerful, AI-driven tools that automate and personalise their marketing efforts, making professional-grade advertising accessible directly from their mobile phones.

Generative AI

Multilingual

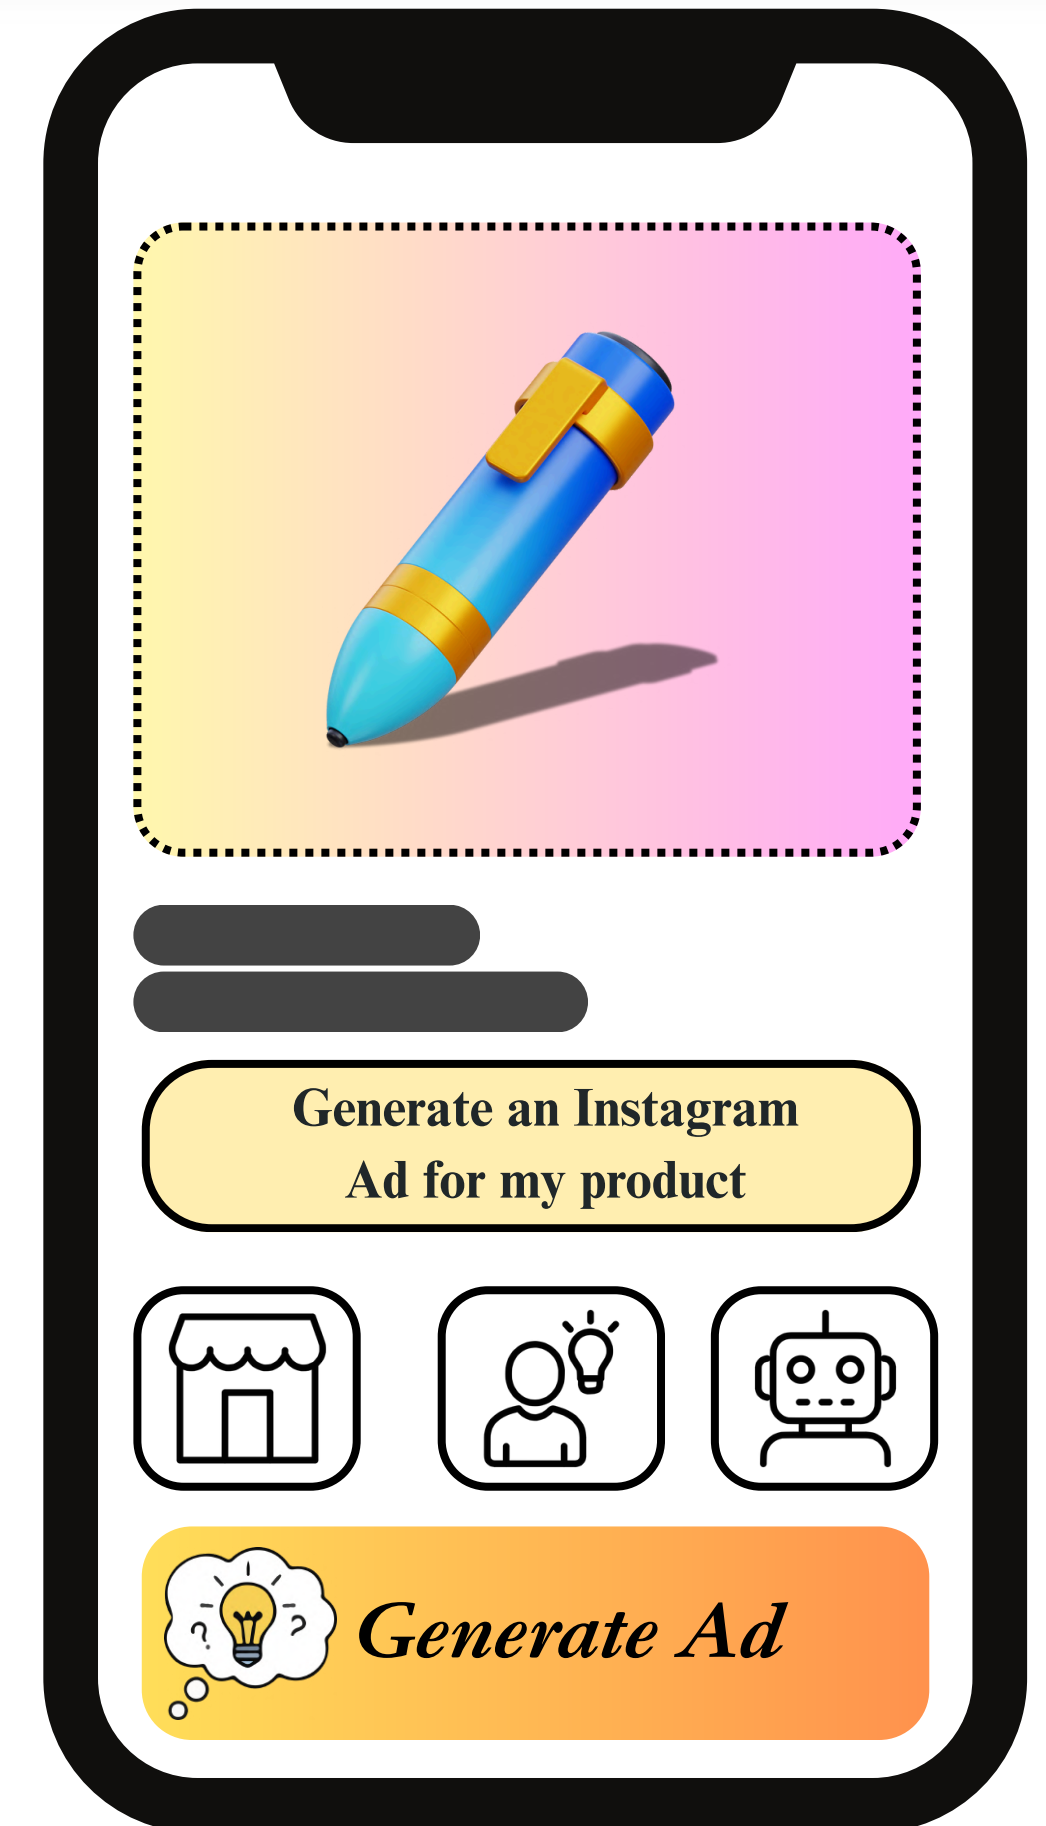

Mobile - First

Easy-to-use

Quick

Creative

Cost-Effective

USP

Ad Agency in Every Shopkeeper's Pocket
without designers, marketers, or recurring agency fees.

Fully Automated End-to-End Pipeline
From image upload to campaign-ready creatives zero manual effort required.

Festival & Context Intelligence
Auto-aligns creatives with regional festivals, offers, and local buying behavior.

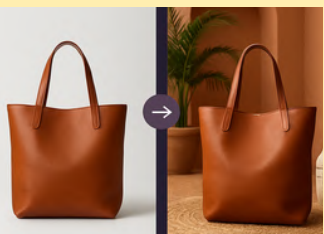

Ultra-Fast Time to Market
Complete ad campaigns generated in 15 seconds, enabling instant promotions.

Massively Affordable
Costs 50× lower than traditional agencies, enabling pricing as low as ₹99/month.

The Struggle

Poor Product Visuals

Shopkeepers take raw photos with messy backgrounds. Low quality hurts brand trust

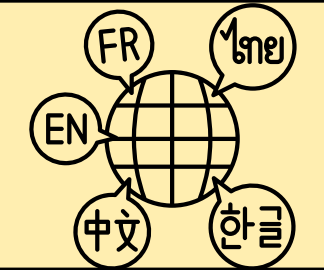

High Marketing Costs

Hiring agencies or designers is expensive. SMBs have zero budget for creative services.

Language Barriers

Most digital tools are English-first. Local businesses struggle to create content in regional dialects.

Irrelative Ads

Advertising irrelative to festives and latest trends can lead to audience being uninterested.

Time and Effort consuming

Customizing whatsapp, instagram, Reels, Status images and video ads takes lot of time and effort

Vyapaar AI

AI Studio Automation

Gen AI automatically removes backgrounds and places products in professional, themed settings.

Mobile-First & Affordable

An easy "Upload & Share" UI for phones. Cost-effective serverless architecture keeps prices low.

Multilingual

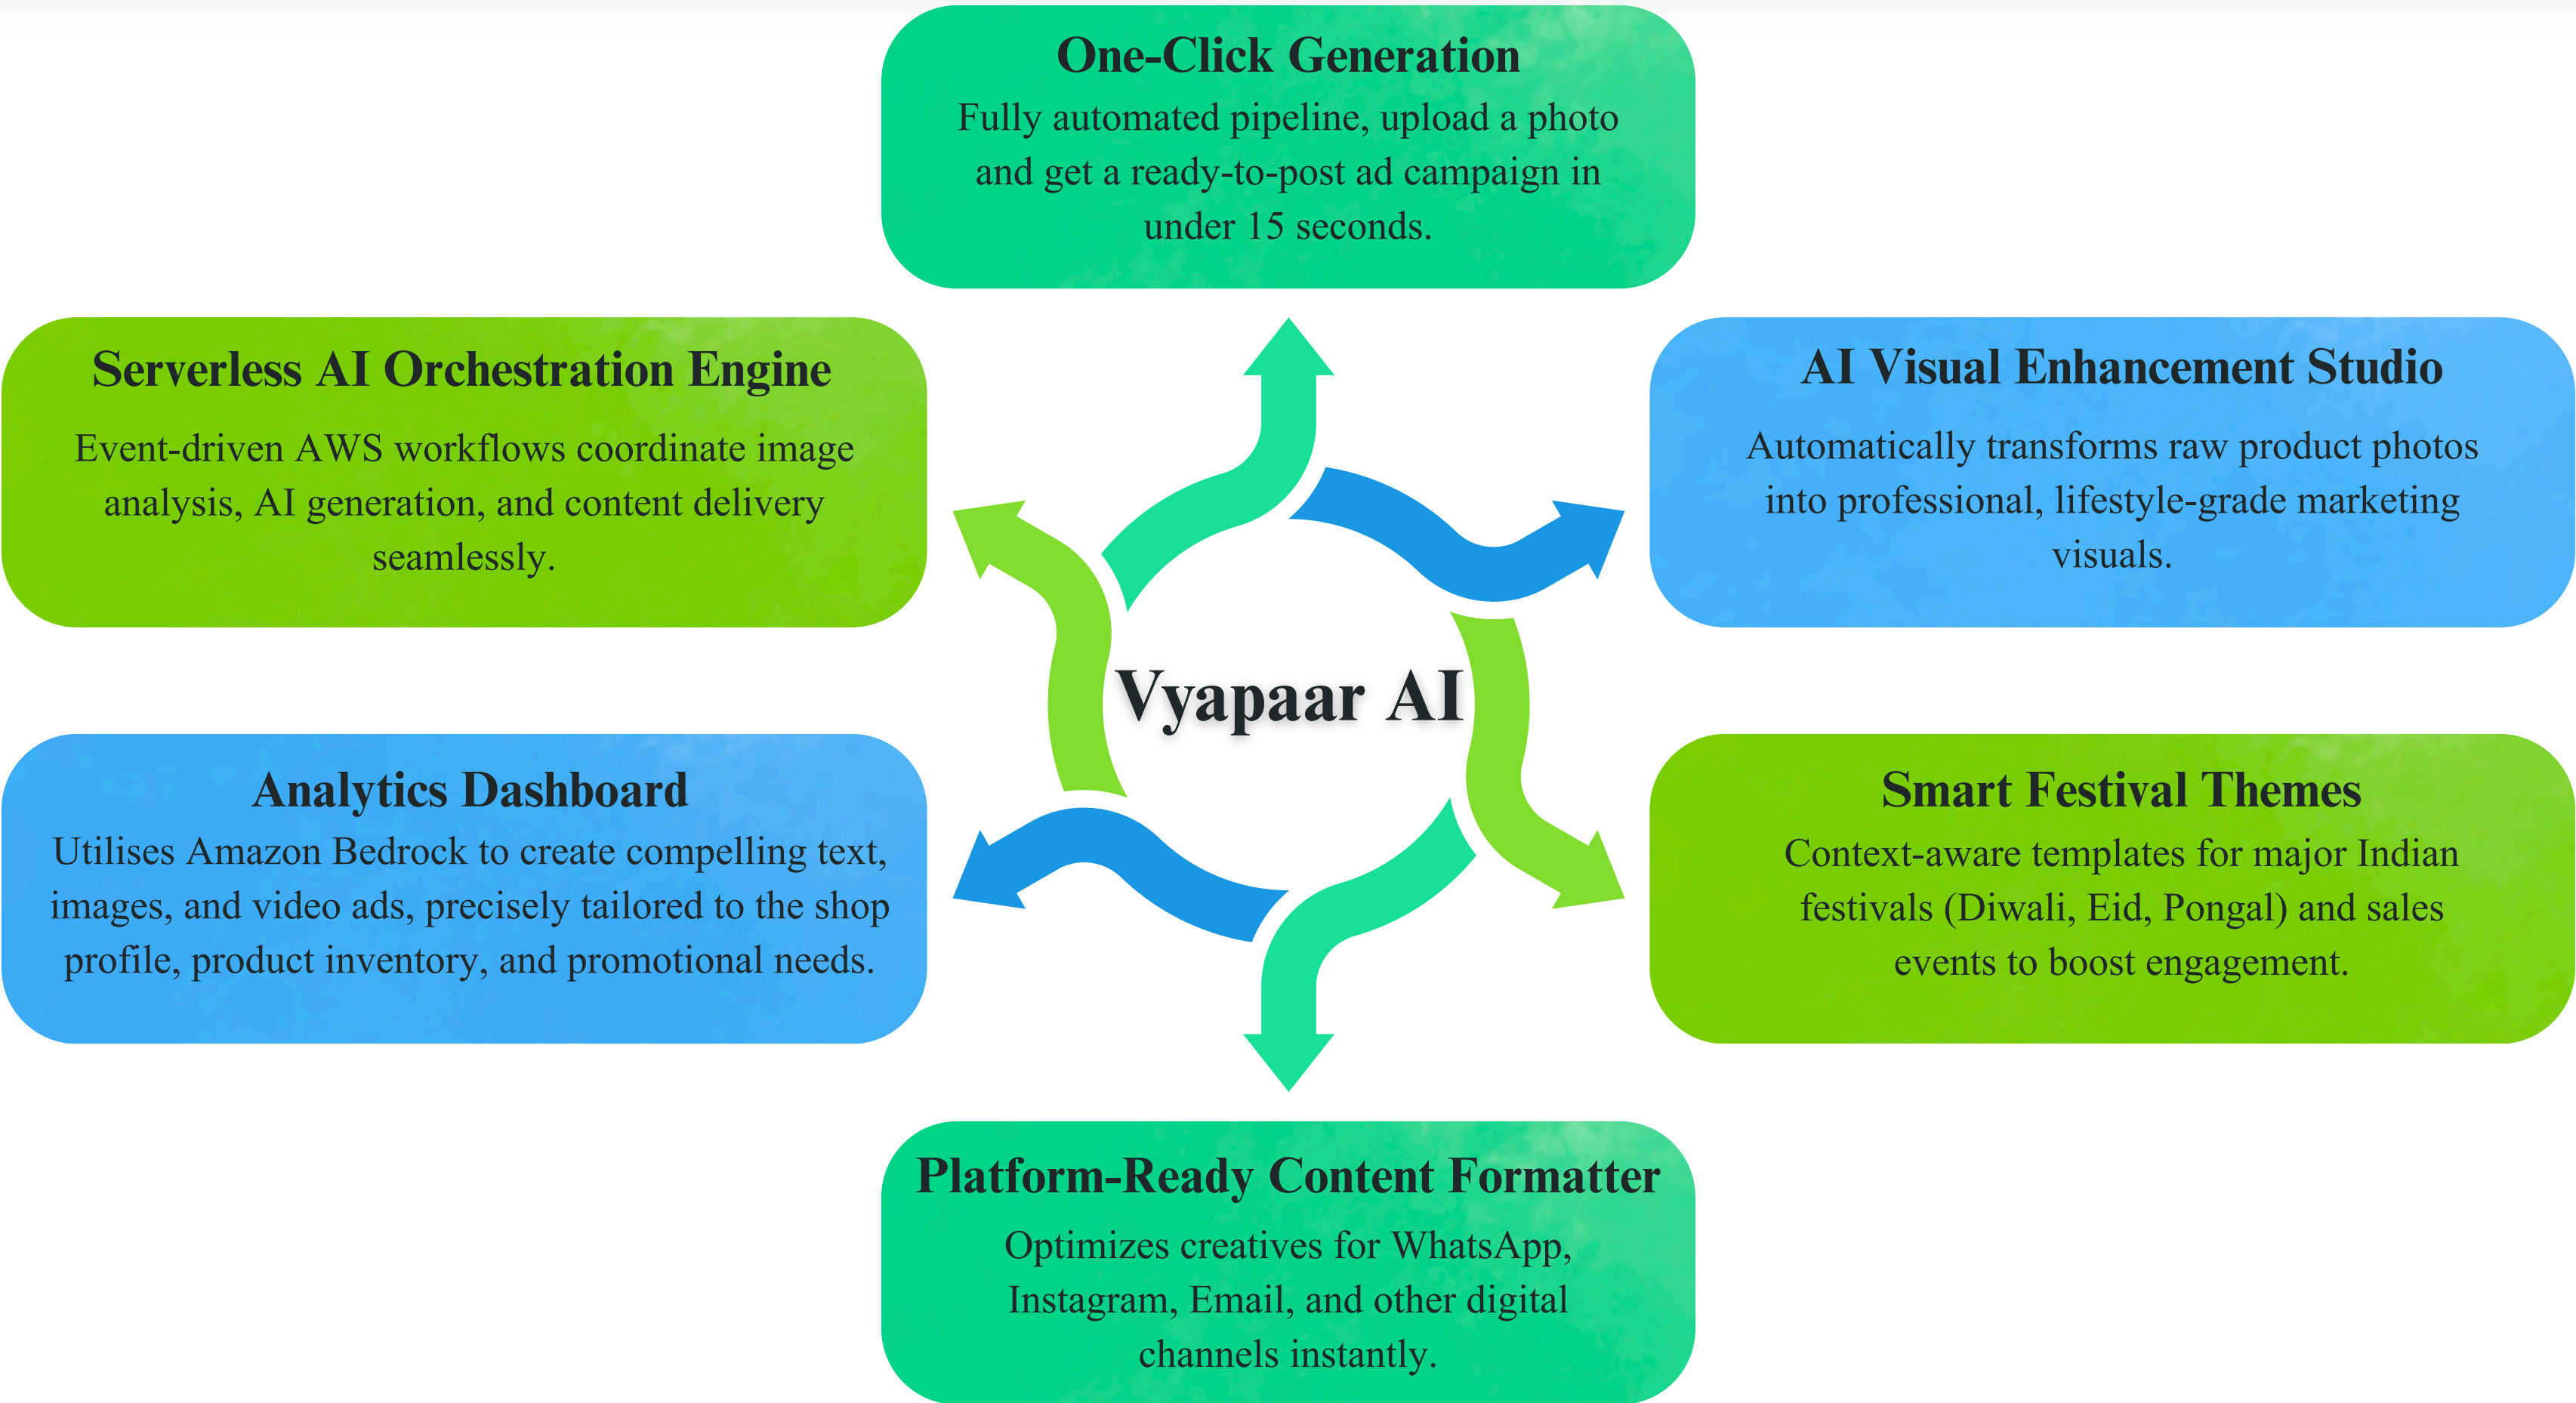

AI copywriting engine (Claude/Titan) auto-generates persuasive ad copy in 10+ Indian languages.

Festival & trend aware Ads

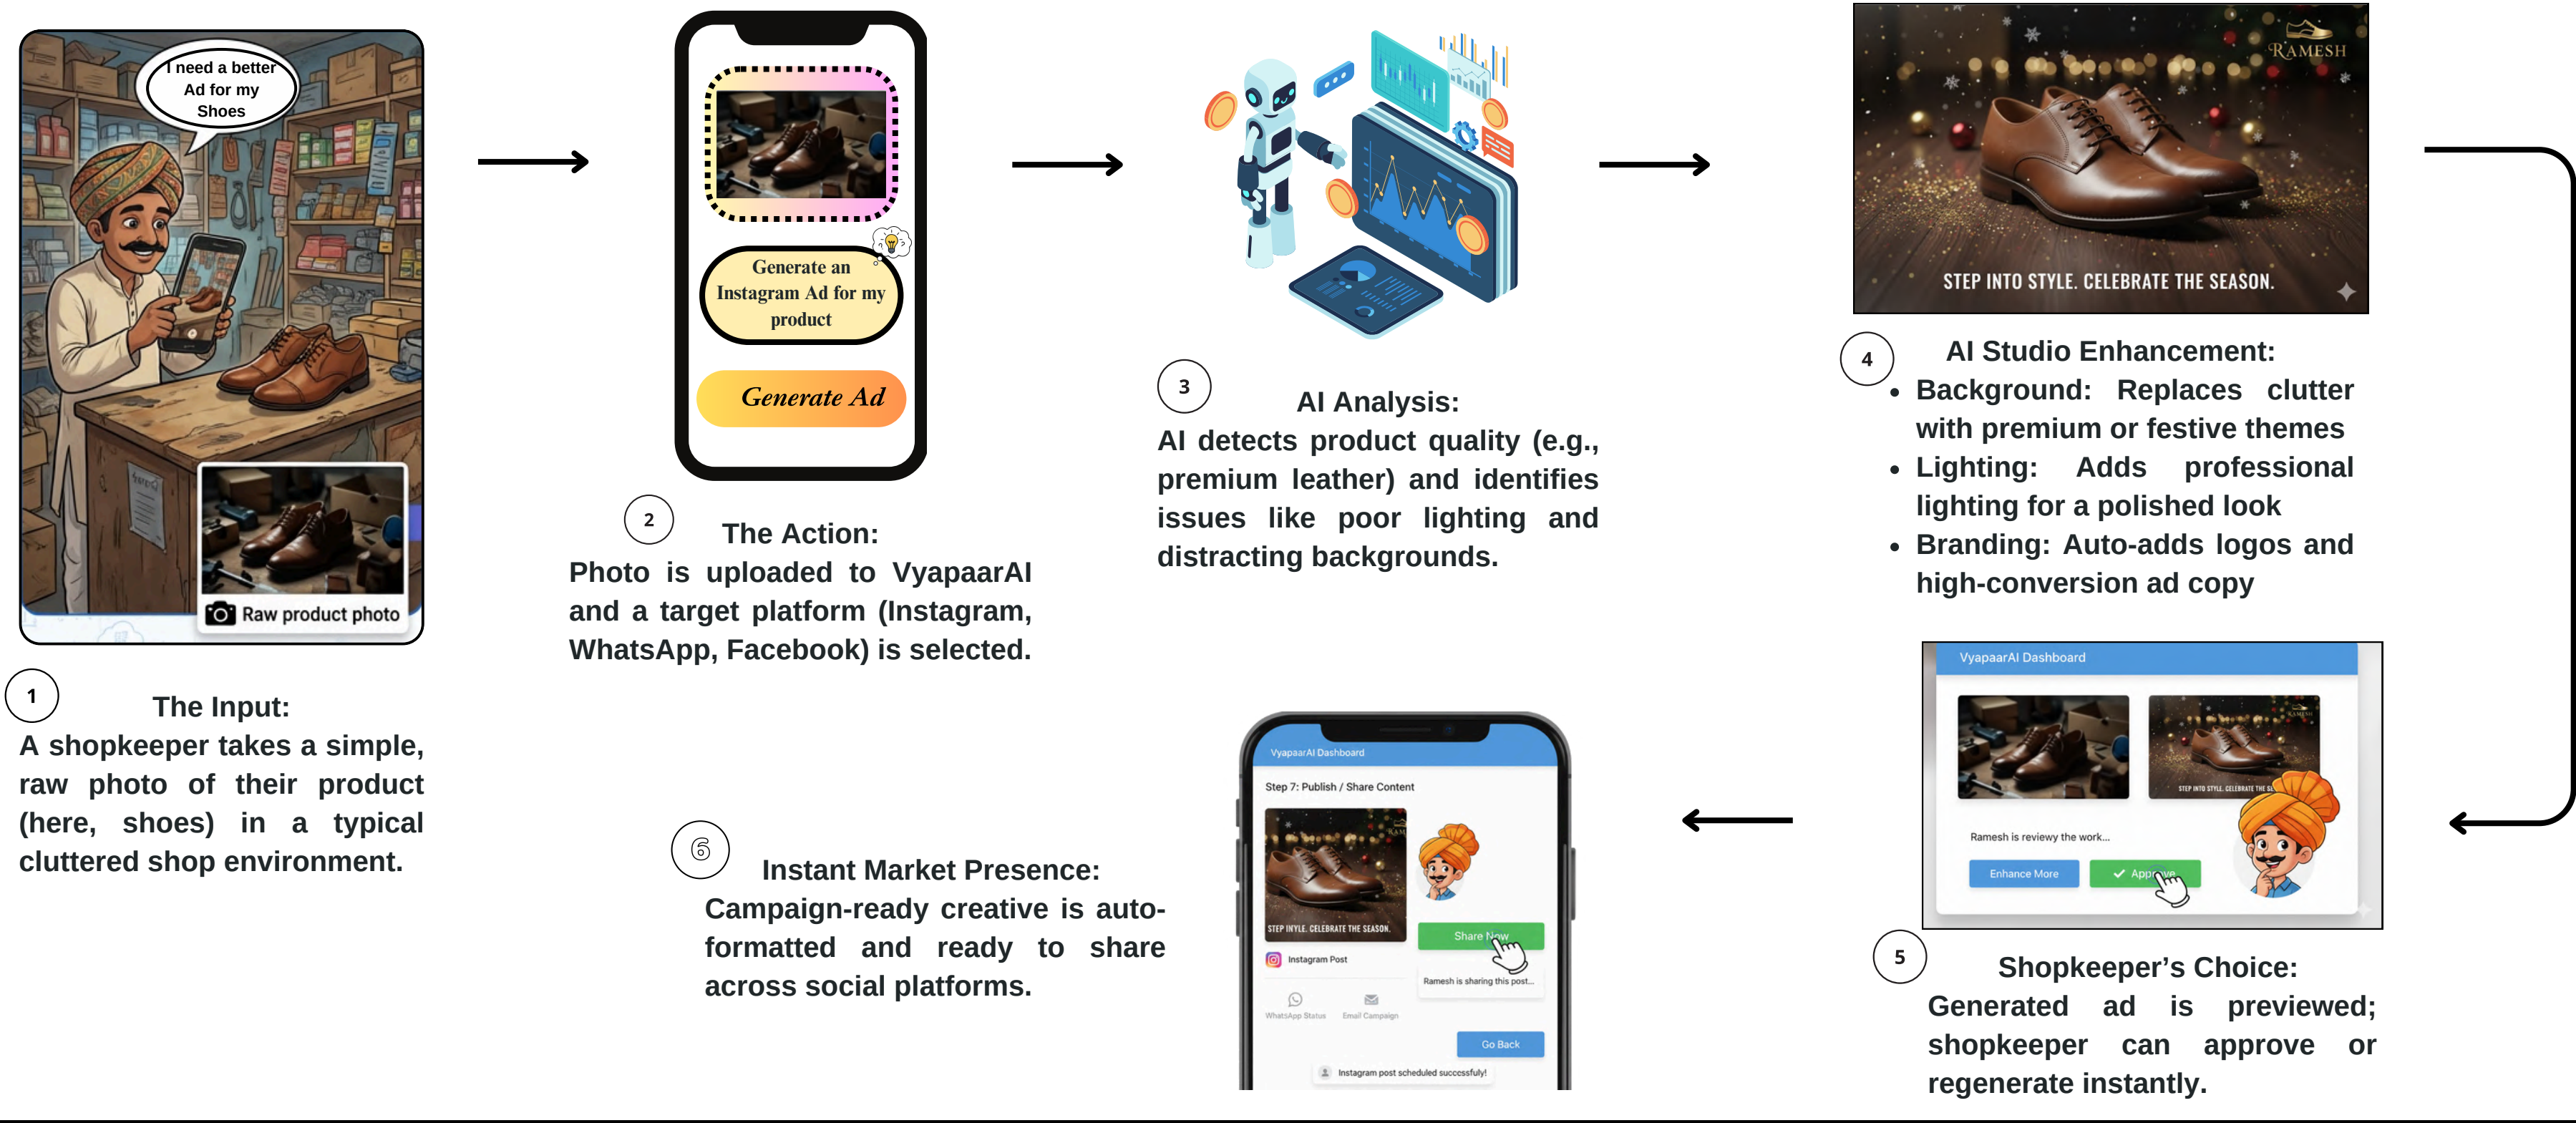

Smart templates aligned with Indian festivals and sales events boost engagement and relevance.

Platform-Optimized Output

Ads are instantly formatted for WhatsApp, Instagram, and Email, no manual resizing or editing.

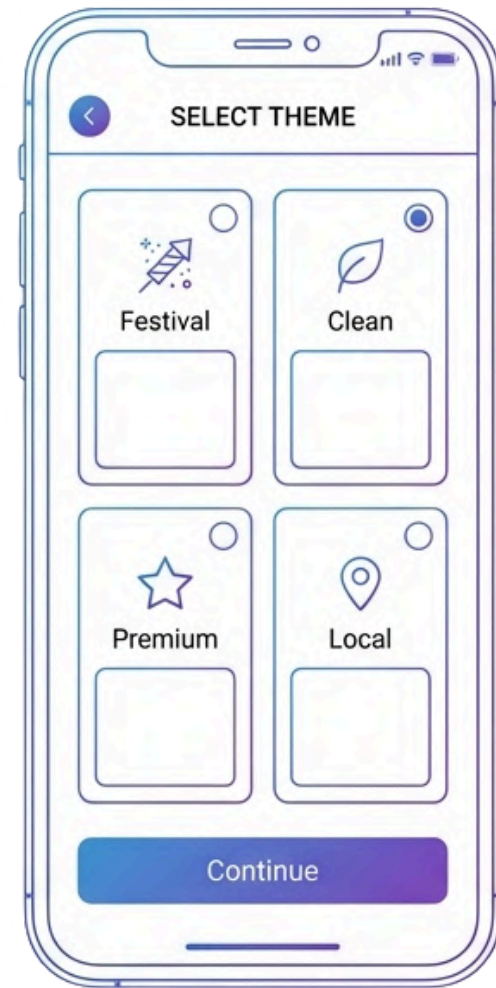

User-Story Diagram

Upload The Photo of the product

Select the theme of the advertisement

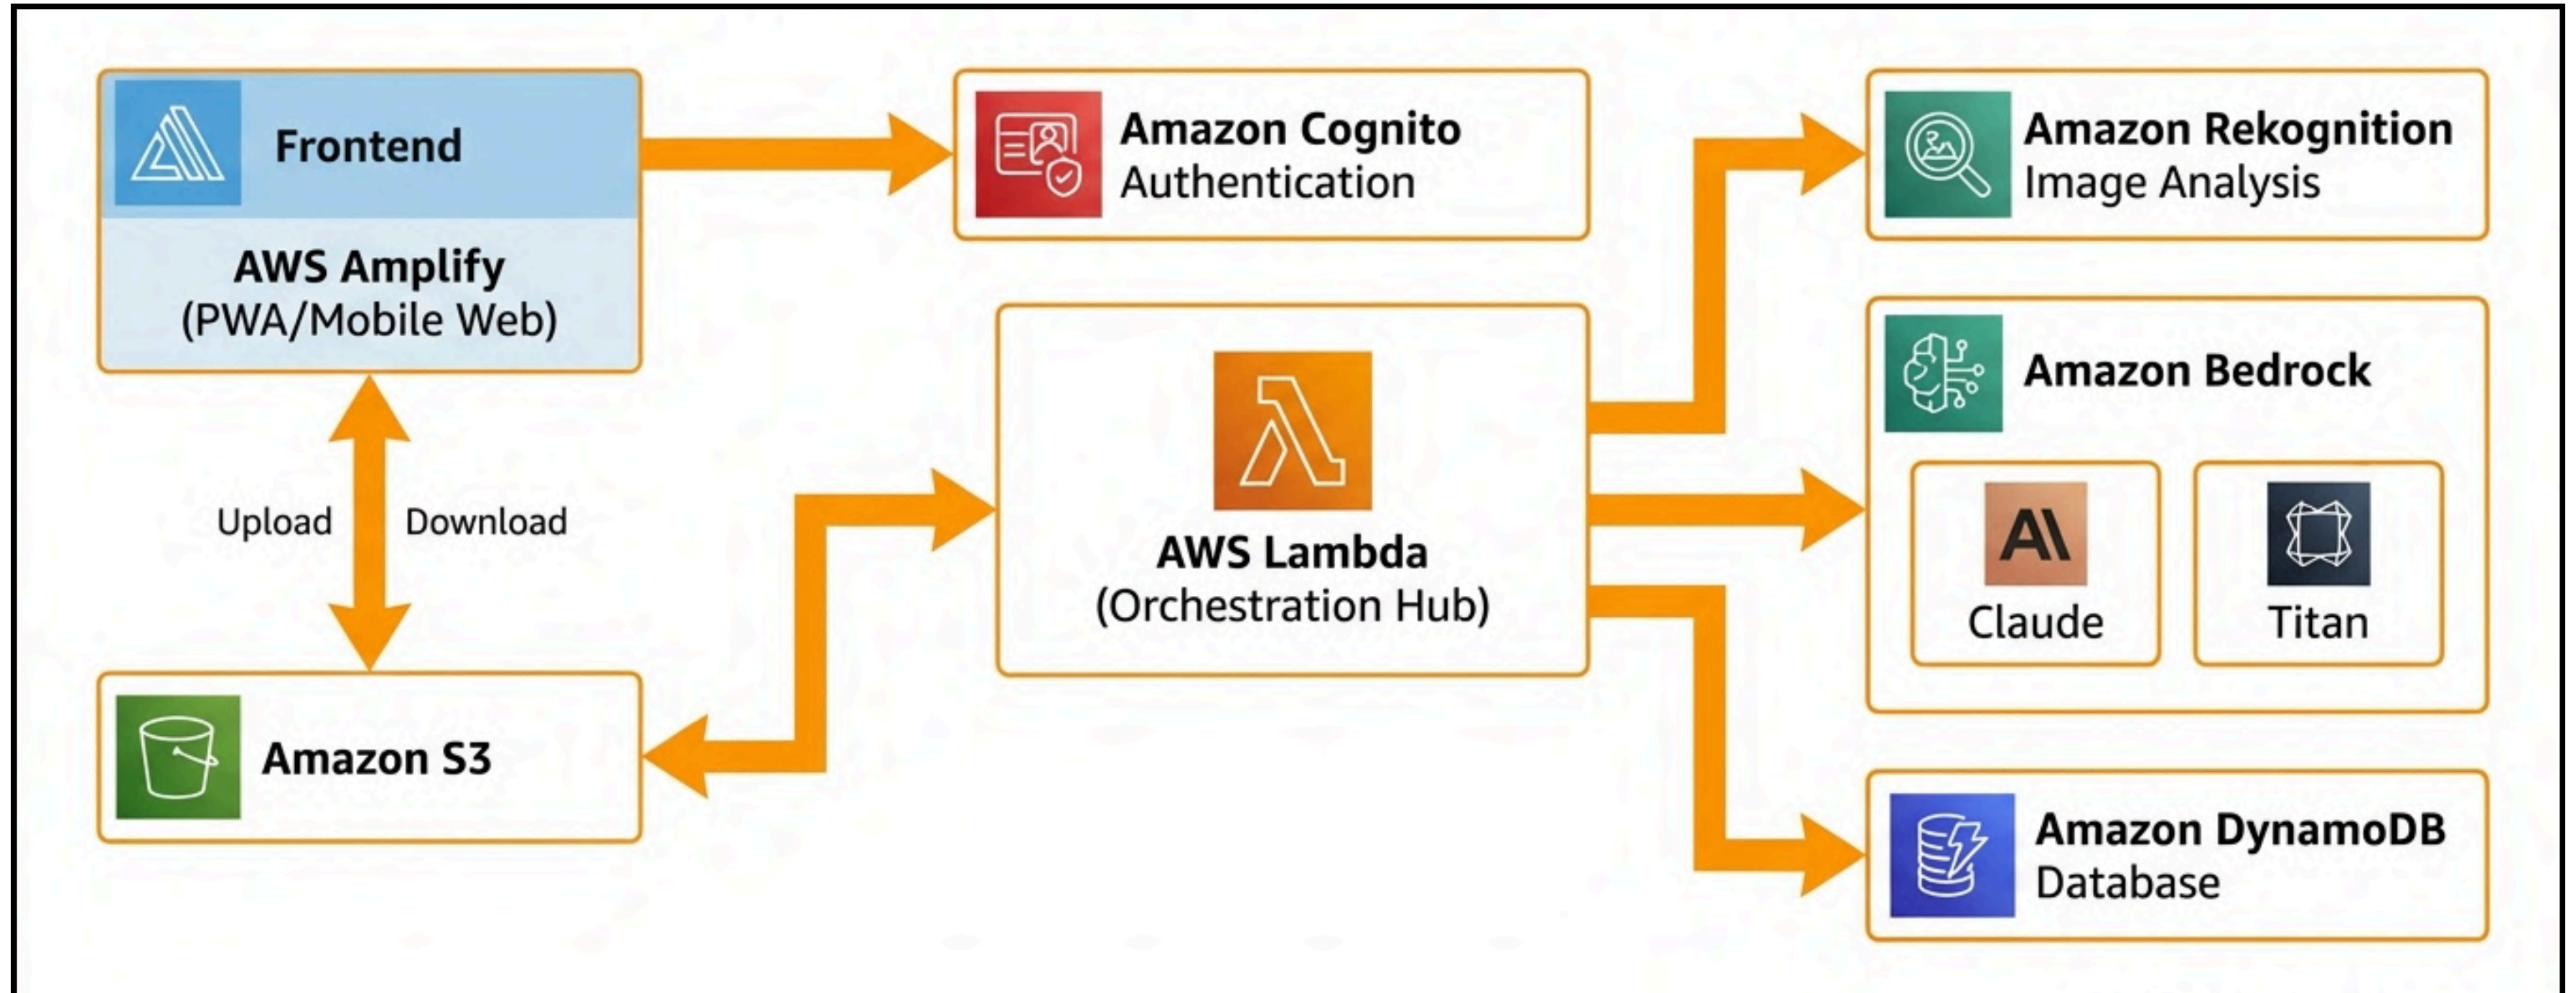

Preview of the generated poster

Easily share the advertisement on social media platform or download it

Architecture diagram

Technologies we use in Vyapaar AI

Frontend

AWS Amplify

Hosts the frontend and automates the deployment for Vyapaar AI.

Security

AWS Cognito

Provides secure user authentication and identity management for shopkeeper accounts.

Storage

AWS S3

Stores raw product uploads and all AI-generated marketing assets.

Compute

AWS Lambda

Triggers serverless backend logic to process images and data instantly.

AI Vision

AWS Rekognition

Scans raw photos to detect products and identify messy backgrounds.

Gen AI

AWS Bedrock

Generates professional multilingual ad copy and studio-quality product backgrounds.

Database

AWS DynamoDB

Stores shopkeeper business details and ad campaign history securely.

Monitor

AWS CloudWatch

Tracks real-time app performance and monitors system health metrics.

Estimated Implementation Cost

Projected monthly infrastructure costs for MVP (First 1,000 Users)

AWS Service	Unit / Metric	Estimated Usage	Rate (Approx. ₹)	Monthly Cost (₹)
AWS Amplify	Hosting + CI/CD	Static Hosting	Free Tier (12mo)	₹0
Amazon Cognito	MAUs	~100 users	Free Tier (<50k MAUs)	₹0
Amazon S3	Storage & Requests	~3 GB + Standard	Free Tier (5GB / 12mo)	₹0
Amazon Rekognition	Image Labels	1,000 images	Free Tier (12mo)	₹0
Bedrock – Titan v2	Image Generation	1,000 images	~\$0.008 per image	~₹733
Bedrock – Haiku 3	Text / Captions	1,000 captions	~\$0.25 / 1M input tokens	~₹10
AWS Lambda	Compute	2,000 ops	Always Free (1M reqs)	₹0
Amazon DynamoDB	Read/Writes	Minimal	Always Free (25GB)	₹0
API Gateway	Requests	2,000 requests	Free Tier (12mo)	₹0
CloudWatch	Logs & Metrics	Moderate	~\$0.50/GB ingested	~₹40
SNS / Secrets Manager	Alerts / Secrets	Low	~\$0.40 per secret	~₹37
Subtotal				₹820
GST (18%)	Mandatory in India			₹148
TOTAL (Approx.)				₹968

Business Model

Plan	Target Audience	Key Benefits	Price (₹ / month)
Free	New users	2 AI creatives/month, watermark	₹0
Starter	Small shops	20 creatives, multilingual captions	₹99
Growth	Growing SMBs	60 creatives, premium themes, priority AI	₹249
Business	High-volume sellers	150 creatives, branding, analytics	₹499

Target Audience

Indian Shopkeepers
Kirana stores, local retail

MSMEs with Limited marketing budgets (< ₹5k/mo)

Entrepreneurs
(Handmade items, Home bakers, digital retailers)

Why It Works

Recurring Revenue
Predictable monthly subscriptions stabilize cash flow.

Affordable Pricing
Prices aligned with typical Indian SMB discretionary spend.

Scalability
Margins improve as user base grows; AI cost is capped.

Low OpEx
Serverless architecture minimizes idle costs.
